### EXPERIENCE

---

#### **PETRONAS - Kuala Lumpur, Malaysia**

Account Executive (Finance – Accounts Receivable)

November 2023 - Present

- Manage end-to-end Accounts Receivable operations for PETRONAS Chemicals Group using SAP ERP (FI/SD), including invoicing, payment clearing, account reconciliation and financial reporting.
- Developed Python and Pandas automation for intercompany reconciliation across multiple group companies, replacing repetitive Excel-based processes and reducing monthly preparation time from approximately 10 hours to minutes.
- Identify and automate manual finance processes using Python, SAP GUI Scripting and Power Automate to improve operational efficiency and reduce repetitive work.
- Designed and delivered hands-on Python automation workshops to 100+ finance professionals across Group Financial Delivery, covering practical applications of Python for finance workflows.

#### **Upwork (Freelance) - (Remote)**

Software Engineer (Mobile application & web)

April 2021 - October 2023

- Developed features for a fintech startup building automated cryptocurrency accounting software, integrating wallet transaction data and AI-assisted accounting workflows.
- Designed REST APIs, backend services and relational SQL schemas supporting production mobile and web applications.
- Designed and developed iOS applications end-to-end, from product development through production deployment, working closely with startup founders.

#### **ZIRAF LTD - London, UK**

Internship - Web Developer

February 2021 – April 2021

- Independently developed and deployed the startup's website and backend infrastructure as the sole developer.

### EDUCATION

---

#### **London School of Economics and Political Science (LSE)**

BSc Accounting & Finance | London, UK (September 2020 – June 2023)

Graduated with Second Upper Class
